

PARENT'S ADVISORY (CORONA VIRUS)

Dear Parents

Good Morning

We advise caution and measures as following:

Corona virus is large in size where the cell diameter is 400-500 micro and for this reason any mask prevents its entry so there is no need to use pharmacists to trade muzzles.

The virus does not settle in the air but is grounded, so it is not transmitted by air.

Coronavirus when it falls on a metal surface, it will live 12 hours, so washing hands with soap and water well enough.

Corona virus when it falls on the fabric remains 9 hours, so washing clothes or being exposed to the sun for two hours meets the purpose of killing it.

The virus lives on the hands for 10 minutes, so putting an alcohol sterilizer in the pocket meets the purpose of prevention.

If the virus is exposed to a temperature of 26-27 ° C. it will be killed, as it does not live in hot regions. Also drinking hot water and sun exposure will do the trick

And stay away from ice cream and eating cold is important.

Gargle with warm and salt water kills the tonsils' germs and prevents them from leaking into the lungs.

Adherence to these instructions fulfills the purpose of preventing viruses.

- ❖ In case any child or adult in your family shows any symptoms of the flu and virus please get in touch with the Ministry of Health and Family Welfare at their 24*7 helpline number +91-11-23978046, immediately.**
- ❖ Please be assured that as a school, the well being of our children is of utmost importance to us. We seek your support and co-operation in this matter and request all parents to take care of the children and themselves. Let us all together, as a community work together towards creating a healthier and safer environment.**

Regards
